

Cornice triggered persistent slab in Suce Creek

Other place

Out of Advisory Area

2/22/2025

Code

ACc-R2-D2-O

Aspect

N

Latitude

45.65530

Longitude

-110.55800

Notes

From IG story. "[Cornice](#) triggered persistent on a protected north face up Suce Creek. 3-4 ft deep. Absarokas are not like the Bridgers, Gallatins, etc. A few weeks ago we found the entire snowpack to be faceted top to bottom in Mill Creek...."
