## Wet slides in S. Madison

Taylor Fork
Southern Madison
3/1/2025
Code
WL-N-R1-D1.5
Aspect Range
SE-S-SW
Latitude
45.06070
Longitude
-111.27200

Another day of warm temps and clear skies allowed us to cover a lot of ground in the Southern Madisons. We rode into the Taylor Fork, up to the weather station, to the top of Carrot Basin, through Sage Basin, up and over into Cabin Creek, and all the way up to the head of Red Canyon.

There were a handful of small wet-loose avalanches on solar aspects that we noted throughout the day. While northerly aspects stayed cold, solar aspects became wet a couple inches down.

Number of slides

3

Notes

Number caught

Λ

Number buried

0

Avalanche Type

Wet loose-snow avalanche

Trigger

Natural trigger

R size

1

D size

1.5
