

Point releases, wet loose in Beehive/Middle Basin

Beehive Basin

Northern Madison

3/29/2025

Code

WL-N-R1-D1.5

Latitude

45.34070

Longitude

-111.39100

Notes

Toured around Beehive and Middle Basins this morning, finding predictably bulletproof snow on most aspects but decent turns aided by the 2-4 inches of snow from last night on northerly terrain that hadn't been destroyed by the sun this week. There were a few brief moments of direct sun throughout the morning, which almost instantaneously triggered point releases from steeper rocky terrain. On the way back through Beehive we observed some much larger debris piles that weren't there this morning from the steel rocky face between the Going Home chute and the prayer flags.
